About the book

English for the Fashion Industry has been developed specifically for people working in, or preparing to work in, the fashion industry who need to use English every day at work to communicate. The book will equip learners with the language skills and vocabulary necessary to understand typical situations in a fashion context.

English for the Fashion Industry consists of eight units. The book covers many different jobs in the industry from pattern cutter to stylist. It follows the development of a garment from design, through manufacture, to promotion and retail. Units from the book work independently and can be selected according to the needs and interests of the course participants. **English for the Fashion Industry** can also be used for self-study.

Each unit begins with a **Starter**, which consists of a short exercise or quiz and serves as an introduction to the topic of the unit. Practical exercises, listening extracts, industry-specific texts, as well as photos and illustrations help you to acquire key vocabulary and expressions. Each unit closes with an **Output** text followed by questions for reflection and discussion.

When you have completed the whole book you can **Test yourself!** with the crossword on pages 68–69. In the appendix of **English for the Fashion Industry** you will also find the **Answer key** so that you can check your own answers if you are working alone. There are also **Transcripts** of the **Listening extracts** and a **Language test** for each unit.

The **MultiROM** contains all the listening extracts from the book. These can be played through the audio player on your computer, or through a conventional CD player. There is also an **A–Z wordlist** with all the key words that appear in **English for the Fashion Industry**. This includes a column of phonetics and a space for you to write the translations of the words in your own language. The **Interactive exercises** let you review your learning by doing exercises that cover the essential language from the book on your computer. This will be particularly valuable if you are using the book for self-study.

OUTPUT

Starting a career in fashion:

Internships, mentoring programmes, and competitions

Internships

People often associate internships with boring tasks, such as getting coffee and making photocopies. However, when an internship is run properly it can be a really fulfilling learning experience. The learning institution, the sponsor and the student sign a learning contract, in which schedules and job duties are defined. Internship duties vary depending on the sector. Students usually work for course credits and are evaluated throughout the semester.

Will an internship lead directly to a job? The answer is not in every single case; it depends on the skills, performance and creativity of the intern. On average, 30–40% of internships lead to a job. In any case, internships offer students hands-on experience in the sector of their choice.

Mentoring Programmes

Designing fashion is an art, but to be a good 'fashion artist' you also have to know how to manage and promote your innovative ideas. Many associations, magazines, and government agencies have initiated mentoring programmes. These are usually aimed at new or recent graduates. Mentoring programmes may support young designers by providing showrooms, pairing mentors to designers, offering workshops on topics like visual merchandising or organizing trips to observe similar work.

Competitions

Various editions of Vogue magazine (US, UK, Italy) have competitions to find bright new talent, run either on their own or in partnerships with government agencies or trade associations. Other associations, such as Malcolm McDowell's and IMG's *Fashion Fringe* in the UK, focus on cultivating talent in the accessories sector. They provide designers with showrooms, where they can show capsule collections to be judged by industry experts. Winners may be awarded paid internships, and many see their creations included alongside major labels at fashion weeks. Some accessory companies have set up their own young talent award projects; Furla in Italy and Aldo shoes in Canada are just two examples.

If you're an extrovert, you may find yourself on a reality TV show such as *Project Runway*, *The City*, or *What Not To Wear*. Winners have great opportunities to launch their careers using the publicity created.

Whatever your area of interest, the fashion industry offers many opportunities to get started in your career.

OVER TO YOU

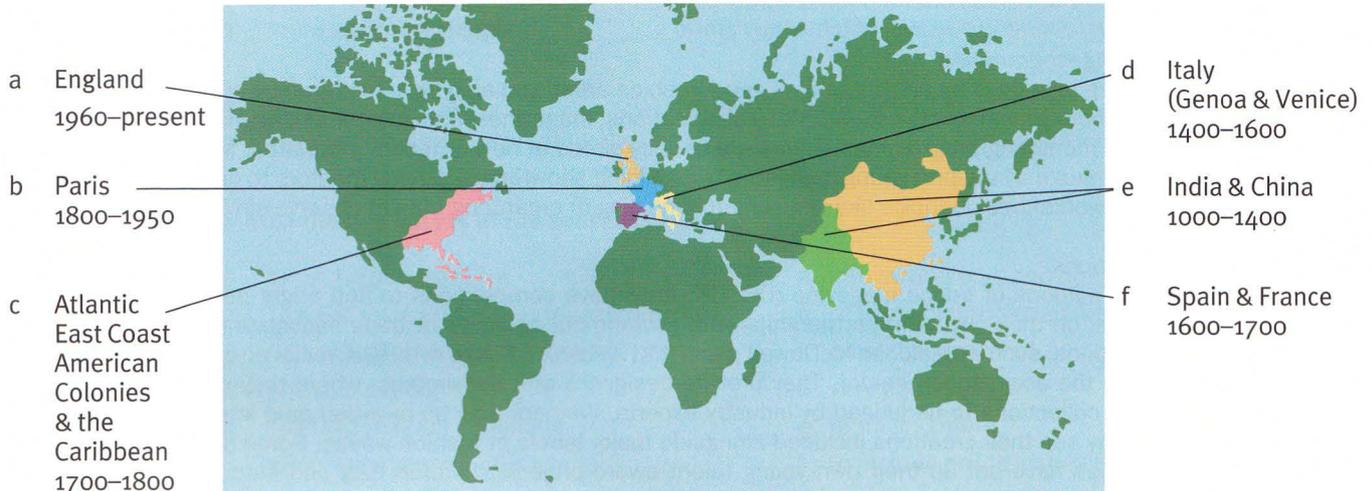

- What do you know about the following ways of entry into the fashion industry in your country: internships, mentoring programmes, talent contests, or reality TV shows?
- Have you ever participated in any of the learning programmes described above? Which one? What advantages did you gain from it?
- If you have never had an experience like the ones described in the article, which one appeals to you most? Why?

History of fashion

STARTER

How has the fashion industry evolved over the years? Match the key events in the history of fashion (1–6) to the geographical region and time period (a–f).

- 1 Street-style designs became very popular. _____
- 2 Marine merchants and traders expanded textile markets and distributed textiles between Asia and Europe. _____
- 3 North American colonists produced cotton for Europe. _____
- 4 A new luxury fabric – silk – was invented. _____
- 5 Haute couture designers, such as Paul Poiret and Charles Frederick Worth, established fashion houses. _____
- 6 Royal courts created fashion labour rules and laws. _____

AUDIO

1 Listen to a fashion historian talking about some important events in fashion. Put the things she talks about in the correct order.

Designers & haute couture houses _____ Sewing machines _____
 Fashion shows _____ World expos and trade fairs _____
 Licensing _____ Department stores _____

2 Listen again and answer the questions.

- 1 What effect did the use of machinery have on the price of clothing?
- 2 Where was the first department store opened?
- 3 What two ways did the House of Worth change fashion?
- 4 What elements did Elsa Schiaparelli use in her fashion shows to make them more theatrical?
- 5 What is the modern version of the trade fair for the fashion industry?
- 6 What did US manufacturers do with licensed fashion labels from Europe?

DID YOU KNOW?

The term 'haute couture', which refers to luxury custom-made clothing, originates from the 'maîtresses couturières' of the seventeenth century. These women were responsible for cutting and sewing garments. While they often had great technical skill, they did not have much influence on fashions. In contrast, modern 'haute couture' is extremely influential on fashion trends.

USEFUL PHRASES

Talking about past events: past simple

Who (invented the sewing machine)?
 How did (the first designers promote their styles)?
 When did (this change)?
 The second industrial revolution brought (new fabrics to the fashion industry).
 The couture houses didn't (miss the opportunity to display their creations).

Talking about past habits: past simple & used to

Singers and dancers *used to walk /walked* the runways.
 Tights *used to be worn /were worn* by men.
 There *didn't use to be /weren't* any shopping centres.

3 Complete the statements using the past simple of the verbs in brackets.

- 1 Fashion _____ (begin) with merchants trading textiles.
- 2 When cotton first _____ (arrive) from the American colonies, Europeans _____ (use) it for home textiles.
- 3 Fashion houses first _____ (organize) fashion shows to promote their designs in the early 1900s.
- 4 Before department stores, consumers _____ (go) to many different specialty shops to find materials for dressmaking or tailoring.
- 5 The two world wars _____ (interrupt) the production of clothes.
- 6 Before the 1900s, designers _____ (not put on) fashion shows.

4 Change the underlined verbs to *used to* where possible.

Although tights and stockings are these days considered to be women's garments, tights were¹ men's clothes before the twentieth century. At first, most tights and stockings were made² of wool; silk stockings cost³ too much for most people to buy. The industrial revolution and mass production made⁴ silk stockings more affordable. Before the twentieth century, women didn't wear⁵ skirts above the ankle, but changes in fashion put⁶ women's legs on display for the first time: hosiery became⁷ very fashionable. The invention of man-made or synthetic fabrics like viscose, polyester and nylon after the Second World War transformed⁸ women's hosiery. These man-made fabrics were⁹ long-lasting and were used¹⁰ not just in hosiery but also for outerwear, home furnishings such as carpet, and even in industrial contexts, as in seatbelts in vehicles.

USEFUL PHRASES

Asking about illustration specifications

How (wide) would you like (the margins)?
 How (detailed / big) would you like (it to be)?
 What kind of (techniques) would you like (to see)?
 How will it be positioned on the page?

Describing illustration specifications

It needs to ...
 It has to / must / should ...
 We would like it to ...
 We want it to ...

5 A designer is talking about the influences on their collection. Find and correct three mistakes in the verbs in bold.

I **used to get**¹ my inspiration for my designs this season from 1980s music, you know, new wave, but mostly hip-hop. When music videos **used to appear**² on television in 1981, they **influenced**³ how people dressed. Our collection looks back to that time. Suddenly, young people **used to start**⁴ wearing clothes like the musicians in the videos. So, you'll see that our accessories echo the early days of hip-hop when people **used to wear**⁵ a lot of gold. But, we also **put**⁶ a new spin on hip-hop style jeans by stitching gold embroidery on the back pockets. They **didn't used to do**⁷ that. We **refreshed**⁸ the hip-hop silhouette by using fitted jeans instead of baggy ones.

6 Read the description in exercise 5 again. Choose the best word or phrase to complete each sentence.

- Get (my) inspiration from* means ...
 - find ideas in other places.
 - give ideas to others.
- Look back to* means ...
 - turning around to look behind you.
 - letting something in the past influence your ideas.
- If a designer *echoes an earlier style* they ...
 - produce exact copies of other garments.
 - use elements of another style in new designs.
- When designers *put a new spin on* a garment, they ...
 - design their own version of it.
 - put embellishments on it.
- Designers *refresh a look* by ...
 - mixing a past style with current trends.
 - using clean vintage clothing in their collection.

**DID YOU KNOW?**

'Dress' is most often used as a noun to refer to a woman's garment. 'To get dressed' means 'to put on clothes' and 'get undressed' means 'take off clothes'. But in a visual merchandising context, we would use 'dress' as a verb: 'Could you dress the mannequins for the window display?'

7 Look at the timeline of fashion trends. Then match the underlined phrases (1-11) in the text to the adjectives (a-k).

- | | | | |

Women's Fashion Trends Through the Decades

1920s

Dresses changed a lot in this decade. They became shorter, and they had low¹ waists.

1930s

As Coco Chanel became more fashionable, women imitated her style of wearing lots of² long pearl necklaces.

1940s

Women became more practical because they worked while men were soldiers in WWII. Folded³ A-line skirts became very popular.

1950s

Dior's New Look became popular: a full skirt that fell to just below the knee, and a jacket with a pulled in⁴ waist. Meanwhile, American teenagers often wore rolled up⁵ blue jeans.

1960s

This decade introduced a more modern – or mod – look compared to the 50s. In London Mary Quant designed miniskirts – skirts where the hemline was above the knee⁶. Hippies wore T-shirts that were multi-coloured using a specialized dyeing technique⁷.

1970s

Women started to wear decorated⁸ wrap dresses.

1980s

Women's careers became very important to them. They wanted to look powerful in offices to compete with men, so they started to wear jackets and dresses with big⁹ shoulders.

1990s

Musical groups such as Nirvana and Pearl Jam made 'grunge' popular, and people copied their style of plaid shirts and torn¹⁰ jeans.

2000s

Many people started wearing skinny¹¹ jeans with all kinds of footwear: trainers, flats, or high heels.

USEFUL PHRASES

Past participles can be used as adjectives to describe trends or styles. Regular past participles are formed by adding *-ed* to the infinitive:

mix ⇒ *mixed*

Many people today wear mixed looks: a tailored jacket with ripped jeans and heels.

There are many irregular verbs:

wear ⇒ *worn*

Many people like their jeans to have a worn look.

tear ⇒ *torn*

He wore a torn shirt and black leather trousers.

8 Complete the sentences with the adjectives from exercise 7. Then match the sentences about trends to the correct images.

- 1 Last weekend's trend report had photos of many celebrities wearing _____ cuffs on their jeans, also showing great shoes.
- 2 At the red carpet event, instead of evening dresses, many women chose to wear _____ trousers with a tailored jacket, heels and jewellery.
- 3 One of the key features of the punk look is _____ jeans.
- 4 Printed tops with _____ waists and skinny jeans became very popular in the 90s.
- 5 Last season's autumn / winter collections got their inspiration from the 80s with _____ shoulders and strong shapes.
- 6 Some summer lines recently included _____ skirts in a rainbow of colours.

From: Camilla D'Arby
To: Jane Rathbone
Subject: Illustration commission

Hi Jane,

We'd like to commission two illustrations from you for our holiday issue. Please have a look at the brief below and then let me know if you have any questions about it.

Illustration 1: An evening gown. We want it to have a soft, elegant, look, so we would like to use an _____¹ illustration.

Illustration 2: A headshot with jewellery. This image should be _____² media. It needs to be a photograph of a model wearing jewellery with some computer _____³ images and hand _____⁴ lines 'traced' on it. It should highlight all the intricate features of the jewellery in a very realistic style, so the illustration needs to be quite _____⁵.

I look forward to seeing your designs!

Best wishes,
 Camilla

14 Read the reply from the artist. Match the questions with the editor's responses (a–e) below.

From: Jane Rathbone
To: Camilla D'Arby
Subject: Re: Illustration commission

Hi Camilla,

Thanks for the brief. There are a few questions I'd like to ask:

Illustration 1

1. How wide would you like the margins for the first illustration?¹
2. How detailed would you like the facial features?²
3. Should I make it look like an old-fashioned illustration?³

Illustration 2

4. How big should the image be?⁴
5. How much of the photo should include computer graphics?⁵

I should be able to finish the illustrations within a week from receiving answers to my queries.

Best wishes,
 Jane

- a The illustration should cover half the page. _____
- b The image has to fill the whole page, so just 5–10mm. _____
- c About 30% of the image. _____
- d Yes, we'd like something that echoes art nouveau fashion illustration. _____
- e They should be quite realistic. _____

The 1920s Cocktail Dress: A reflection of women's rights

The way society expects women and men to behave has been reflected throughout history in the style of dress. The late 1800s are commonly referred to as the Victorian age, after Queen Victoria of England. During this period there were many restrictions on women's behaviour and consequently on the clothes they wore. Socializing mostly took place at teatime in private homes, or outside at tea houses. At these events women often socialized only with other women. They wore long tea gowns which were specifically designed to 'protect women's modesty'.

However, at the same time women's rights movements were starting up all over the world, demanding more rights, such as the right to vote, own land, or earn the same pay as men. As a result of one of these campaigns, women in the United States won the right to vote in political elections in 1920, and British women in 1928. This new-found political freedom was reflected in fashion, most notably in the invention of the cocktail dress. It was designed to be worn at 'cocktail hour' (in the early evening between 6.00 and 8.00 p.m.) and the dress was fashioned to be a stylish garment with a look halfway between daytime and evening.

Without doubt the most successful of all cocktail dresses was the 'little black dress' (or LBD), which Chanel and Patou are credited with designing in 1926. Two of its most distinctive features were its shorter hemline and black colour. The original design also included a matching hat, shoes and short gloves.

One group of women in the 1920s expressed their new political rights through fashion: the Flappers. Always ready to break society's rules, Flappers went to cocktail parties, moved energetically to dances such as the Charleston, drank alcohol, cut their hair short and had jobs. As the years went by, new, more liberated styles emerged on the cocktail party scene: Dior's shorter dresses of the 1950s, or Galitzine's palazzo pyjama trousers, and Pucci's one piece suits in the 1960s.

Fashion was ready to celebrate women's rights with style and to go with women into a new, liberated era.

OVER TO YOU

- What other social movements have been reflected in fashion?
- Do you think men and women no longer have any restrictions on their clothing choices? Why, or why not?
- In the past 100 years, how much have attitudes changed towards women's clothing in your country?

3 Listen. Put the stages in exercise 2 in the correct order.

4 Listen again and complete the extracts.

- 1 First, the raw materials have to be _____.
- 2 The seeds and leaves in natural materials like cotton need to be _____ so they don't go into the final textile.
- 3 Next they are ready to be _____ into yarn or thread.
- 4 Once the yarn or thread is ready, the material is _____ into fabric rolls.
- 5 After that, the fabric may be _____ – either dyed or printed.
- 6 Finally, the fabric may be _____ or decorated.

USEFUL PHRASES: EXPLAINING THE SEQUENCE OF A PROCESS

When we describe a process we often use the passive:
Fabric is made from raw materials.

First / To begin with ...
 Second / Then / Next / After that ...
 Before the fabric is (dyed), it is (woven).
 At the same time ...
 Once / When the fabric has been (woven), it is then (dyed).
 Finally / In the last stage ...

5 Complete the description of the dyeing process using sequencing words from the Useful Phrases box. There may be more than one possible answer.

_____ ¹, large vats of water are prepared and the dye is mixed.
 _____ ² the dye mix is ready, it is added to the water. _____
 _____ ³ the fabric is dyed, a small sample is tested for colour fastness. _____
 _____ ⁴ all of the fabric is dyed, and _____ ⁵ it is dried,
 sometimes in a drying machine and sometimes in the sun. _____ ⁶,
 embellishments are added, when requested by the clients.

6 Correct the errors with the passive in these sentences.

- 1 T-shirts are often *woven* from cotton or a cotton / polyester mix.
- 2 Before cotton is *spinned* into yarn or thread, it is cleaned and sorted.
- 3 Graphic T-shirts are *embellishing* with images, which can be printed or applied with a transfer.
- 4 Cotton can be naturally *died* using vegetable or herbal dyes.
- 5 Sometimes several lab dips are *did* before the correct colour is obtained.

DID YOU KNOW?

Fabrics have different thicknesses depending on the weight of threads or yarns. It is measured in terms of *deniers*. The word *denier* comes from the French and refers to an old coin. The weight of one denier was said to equal a small amount of thread or yarn. In fact, the sheerness (lighter colour) or opaqueness (darker colour) of stockings is described as 10 den, 20 den, 30 den, 40 den, etc. Microfibres are less than 1 den.

7 Listen to the promotional information from FabriTex’s YouTube channel about its fabric production services. Put the services in the order they are mentioned.

fabric testing _____ dyeing _____ finishing _____
 embellishment _____ providing expert advice _____

8 Listen again. Mark the sentences True (✓) or False (X).

- 1 FabriTex offers a choice of plant or chemical dyes.
- 2 They test for colour fastness.
- 3 The colour fastness of indigo fabrics is guaranteed.
- 4 For white fabrics they use a chemical bleach.
- 5 They have a finishing process for strengthening fabrics like denim.
- 6 They do not offer fabric printing services.

9 Match the written care instructions for the garments (a–e) to the care symbols (1–5). There may be more than one possible answer.

1		_____	a		This garment is treated using industrial dyeing processes that give it a ‘lived in’ look. Do not use solvents. Wash separately inside out at 30°C. Dry the garment inside out and do not expose to sunlight. Steam iron.
2		_____ _____	b		Machine wash cold on gentle cycle with like colours. Only non-chlorine bleach when needed. Remove promptly from wash while still damp. Hold both ends, twist tightly and knot. Tumble dry low. Do not iron.
3		_____	c		Dry clean only. Do not machine or hand wash. Do not spin or twist. Low or steam iron only.
4		_____ _____ _____	d		The special finish of this pure cloth has original irregularities to bring out the natural aspects of the weaving and artisan dyeing process. A gradual change in colour is characteristic of this process. Wash separately with like colours at 30°C. Line dry, and iron on high.
5		_____ _____ _____	e		Wash by hand using mild detergent. Do not wring garment. Lay flat to dry and reshape. Do not dry clean.

USEFUL PHRASES: WRITING CARE INSTRUCTIONS

Washing

Hand / Machine wash.
 Wash with light / dark colours / separately.
 Use mild detergent.
 Dry clean only.

Drying

Tumble dry low / medium / high.
 Line dry.
 Lay flat to dry. Reshape.
 Dry the garment inside out.

Ironing

Iron on low / medium / high.
 Steam iron.

Special Care

Do not wring.
 Twist and knot.
 Do not bleach

Fur: Real, fake, or nothing?

Since man first put on clothes people have worn fur, first and foremost because it's very warm. But over the centuries fur became exclusive and by the sixteenth century it was seen as a luxury textile. At that time, it was worn on the inside as a lining for coats, with only a little trim visible. In the early twentieth century, wearing fur on the outside of coats became fashionable. But more visibility meant more controversy and negative opinion. These days nothing in fashion divides opinions more strongly than fur.

What do the animal rights campaigners object to? Fur producers have often been criticized for bad treatment of animals, such as keeping animals in small cages and not giving them enough food and water. In response, fur producers say they run transparent operations and use clear labels to tell consumers exactly where their fur comes from.

The fight against fur has been led in recent years by PETA (People for the Ethical Treatment of Animals), the largest animal rights organization in the world. They have attracted attention for their often shocking campaigns, including a series of nude photographs of top models and celebrities under the headline 'I'd rather go naked than wear fur'. In the 1980s and 90s, fur sales fell dramatically and PETA's campaigns were a big factor in this. And with the improved development of fake furs, consumers found little reason for buying real fur.

The fur industry has hit back at animal rights campaigners, stating that real fur is much more environmentally friendly than fake fur. It believes that manufacturing fake fur involves dangerous chemicals, damaging the environment, and that real fur is natural and biodegradable. It has also said that younger women, inspired by celebrities, have begun to wear real fur again. Most major fashion houses support this renewal in fur by featuring it in a few pieces each autumn / winter collection.

It is impossible to predict whether the trend towards using fur in fashion will continue. Some say fake fur will overtake the real version. Others say fur is here to stay. What is certain is that wearing fur will always be a decision that divides people.

OVER TO YOU

- How do you feel about fur in fashion? Is it acceptable to wear fur, or should it be regulated or even banned?
- Will fake fur eventually replace real fur? Why, or why not?
- Do you agree with the anti-fur movement's shock campaigns? Why, or why not?

Label the equipment that pattern makers use (a–e) with the words from the box. Can you think of any other equipment?

- CAD software • cutting machine • pattern paper • plotter • sewing machine

a _____

c _____

d _____

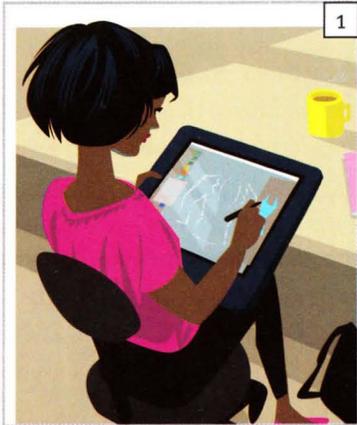

e _____

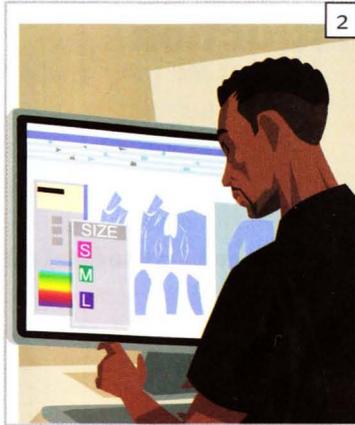

DID YOU KNOW?

Computer Aided Design often uses Pattern Design Systems (PDS), which are computer software programs that can digitally organize pattern pieces to be cost-effective. These programs can calculate the amount of fabric needed and its cost. They also make grading changes easier without wasting fabric.

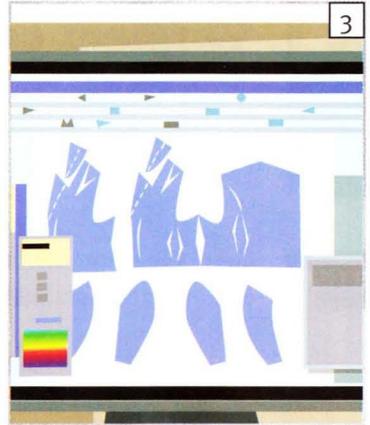

1 Match the stages in the pattern making process (a-i) with the pictures (1-9).

- a cut a sample garment
- b revise measurements
- c sew a prototype
- d develop specifications (specs)*
- e lay out pattern pieces on CAD software

- f approve the final pattern
- g fit a garment on a model
- h draft a preliminary pattern
- i grade measurements for sizes

* Specifications for measurements and pattern pieces usually is shortened to spec or specs. These are often listed on a specification sheet.

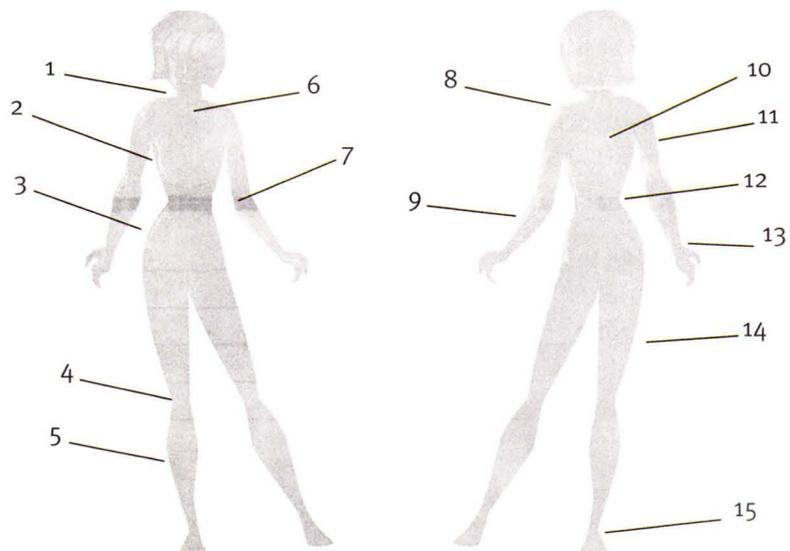

2 Read the pattern maker's comments (1–6). Underline the correct alternative.

	S cm / in	M cm / in	L cm / in	XL cm / in
Shoulder	56 / 14	38 / 15	38 / 15	39 / 15 ½
Around chest	81 / 32	86 / 34	91 / 36	97 / 38
Around waist	66 / 26	71 / 28	76 / 30	81 / 32
Around hips	86 / 34	91 / 36	97 / 38	102 / 40
Sleeve	79 / 31	82 / 32	84 / 33	86 ½ / 35

- 1 We need to *revise* / *sew* the sleeve by at least two centimetres for the medium size, so we'll have to take it in.
- 2 When we *laid out* / *developed* the spec sheet, we didn't include the extra small size.
- 3 Could we *draft* / *grade* all sizes to give an extra centimetre more around the waist for ease of comfort?
- 4 Remember to *cut* / *develop* the chest extra wide to allow for ease of movement.
- 5 Has the head pattern maker *approved* / *sewn* this spec sheet yet?
- 6 Let's wait until we *set* / *fit* it on the model before we make it any bigger.

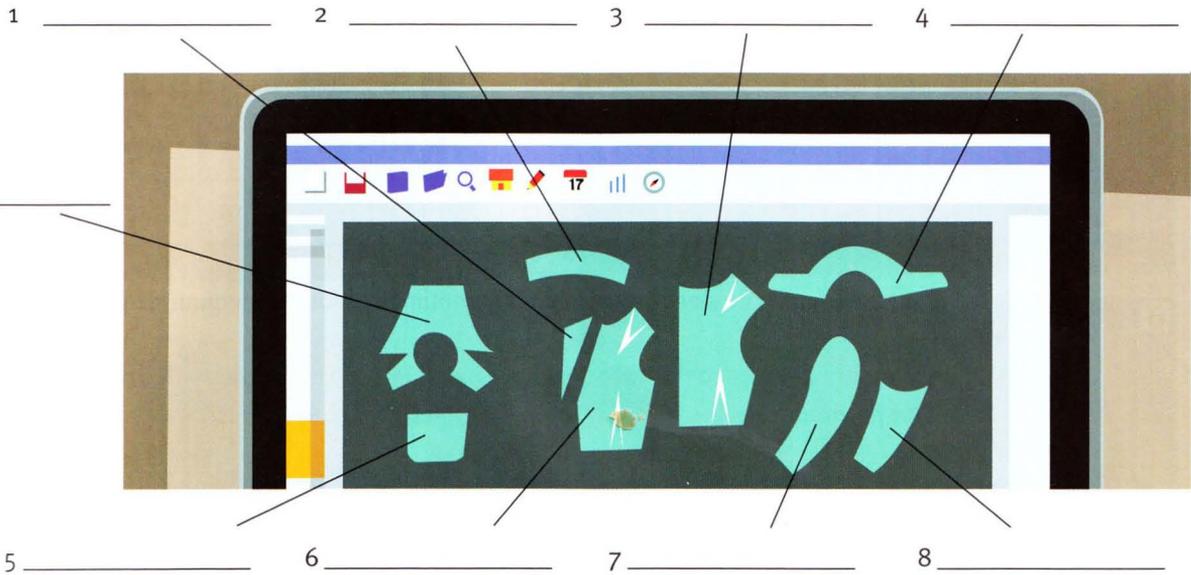

3 Label the parts of the body with the words from the box.

ankle • back • calf • chest (bust) • décolleté • elbow • hip • knee
 • lower arm (forearm) • mid-thigh • neck • shoulder • upper arm • waist • wrist

4 Match the pattern pieces for a jacket with the words from the box.

back bodice • collar • cuff • front bodice • lapel • top pocket
 • top sleeve • under sleeve • yoke

5 Match the pattern pieces in exercise 4 to the parts of the body in exercise 3. There may be more than one possible answer.

6 Listen to five conversations about garment patterns. Which pattern pieces are mentioned? Choose the correct alternative.

- 1 collar / cuff
- 2 top pocket / under pocket
- 3 back yoke / back bodice
- 4 under sleeve / lining
- 5 top sleeve / under sleeve

7 Listen again. What changes are discussed for each pattern piece?

- 1 cuff: reduce it to _____.
- 2 top pocket: add _____.
- 3 back yoke: cut it _____.
- 4 lining: sew it _____.
- 5 top sleeve: let it _____.

DID YOU KNOW?

Different countries use different measurement systems for fabric amounts. The US, Canada, and Mexico use yards and inches, while most other countries use metres and centimetres. 1 yard = 0.9144 metres, and 1 inch = 2.54 centimetres.

USEFUL PHRASES**Discussing specifications**

Are we supposed to ...?
 Do you think we need to...?
 Was there anything (you) wanted to change?
 What does the spec sheet say?
 This needs to be (cut horizontally).
 We need to / We'll have to (add another pocket).
 Look at (how the yoke cuts).
 Let's see (how the fabric works).

Adjusting measurements

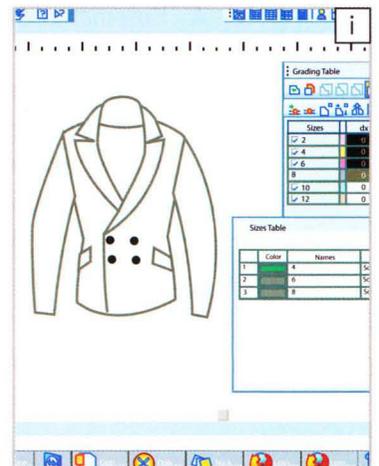

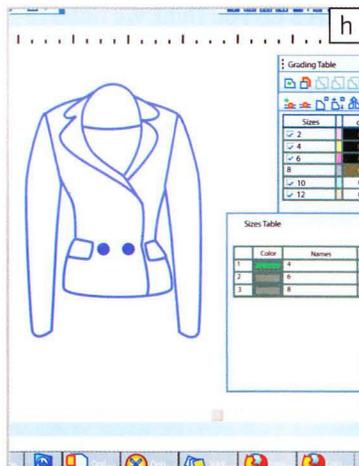

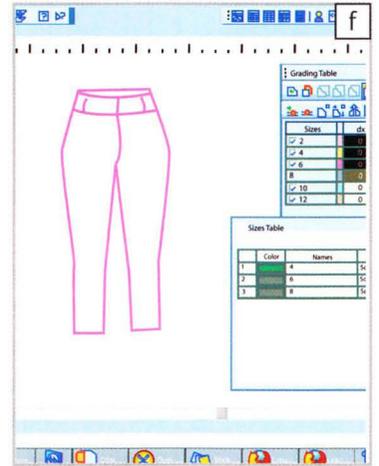

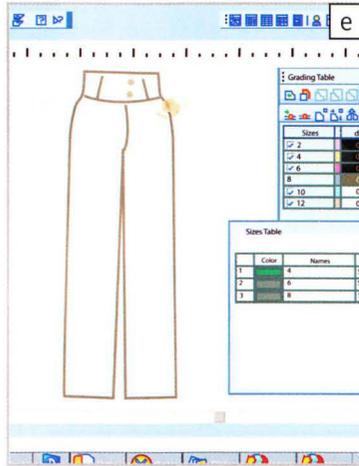

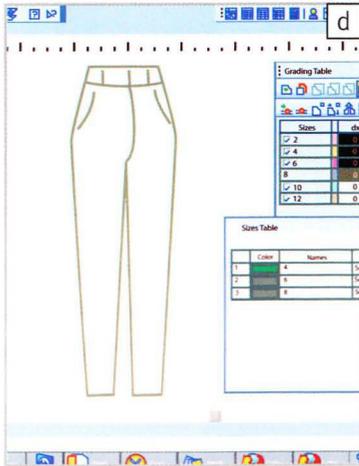

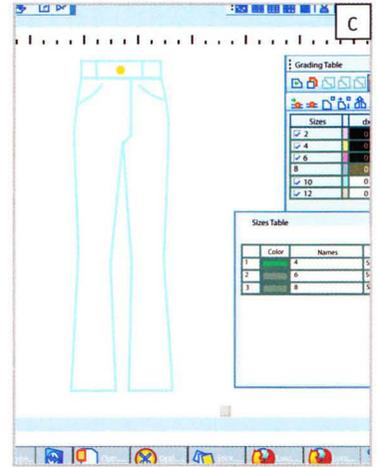

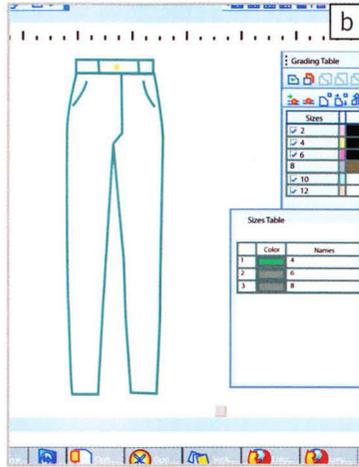

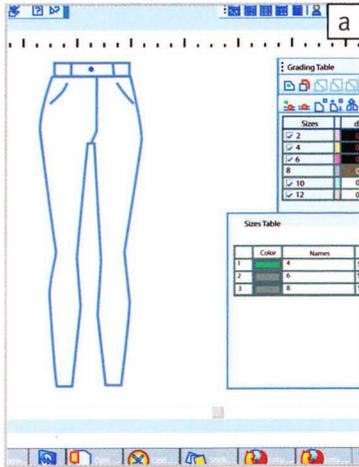

take (the leg) up (by 2cm) = make shorter
 let (the hem) down = make longer
 take (the waist) in = make narrower
 let (the sleeve) out = make wider
 allow for ease of comfort
 take __ cm off
 add another __ cm (around the shoulders)
 centimetres, metres / inches, yards

8 Complete the pattern makers' conversations using the words from the box.

add • allow • let down • let out • take in • take off

- 1 A The jacket waist was a bit tight on the fit model, so we'll have to _____ it _____ a bit.
 B How much do you think we need to _____?
 A $\frac{3}{4}$ cm will probably be enough.
- 2 A The specification sheet for the women's blouse only gives the measurements for size 10. Are we supposed to grade a size 8 as well?
 B Yes. We need to _____ it _____ by $\frac{1}{3}$ cm around the waist and shoulders for the smaller size.
- 3 A How many centimetres do you think we need to _____ for ease of comfort around the shoulders?
 B I would say just $\frac{1}{2}$ cm.
- 4 A Look how far the sleeve falls on this shirt – it's too long. Let's _____ $\frac{1}{2}$ cm so it falls exactly at the wrist.
 B OK. Also, the lower shirt hem needs to fall at the hip, not at the waist, so we'll need to _____ it _____ by 3 cm.

9 Label the pictures of typical cuts and silhouettes with the correct words below. Which ones are fitted or loose fitted?

1 Jeans
 straight leg _____
 boot cut _____
 skinny _____

2 Trousers
 wide leg _____
 tapered _____
 cropped _____

3 Jackets
 double-breasted _____
 cinched waist _____
 cropped _____

10 Listen to the designer and pattern maker at Fast Wear discussing their autumn / winter line. Which cuts and silhouettes do they mention?

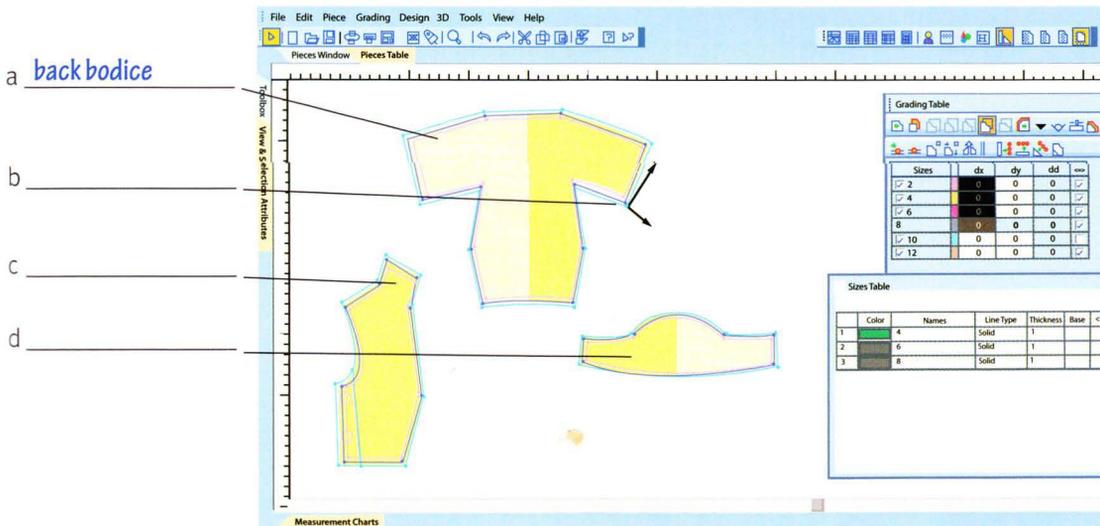

- 1 jeans _____
- 2 trousers _____
- 3 jackets _____
- 4 shirts _____

11 Listen again. Correct the wrong information in bold.

- 1 They're **confident** wide leg trousers would sell well.
- 2 The double-breasted jacket is **absolutely perfect** for the casual line.
- 3 The drafts for the fitted shirts will make the pattern 3cm **larger**.

12 Look at the CAD garment pattern for a woman's blouse. Match the words with the definitions. Then label the images.

grading points • seam allowance • drill hole • right-angle • scale • notch

- 1 _____ a mark that indicates where design details (e.g. pockets, tucks, pleats, button holes) should be placed.
- 2 _____ a mark that is used to show where two pieces of fabric will be sewn together on a garment.
- 3 _____ the area between the edge of the fabric and the stitching line.
- 4 _____ places on a pattern where you want the size to increase or decrease.
- 5 _____ two lines set at 90 degrees from each other.
- 6 _____ a system for grading a pattern in different sizes.

OUTPUT

Does one size really fit **all**?

Have you ever gone into one store and tried something on in your size, only to go to another store and find out that the same size is too small? Frustrating, isn't it? It seems that clothing manufacturers grade sizes according to separate systems.

It's important for clothing manufacturers to keep in mind their target market. But for a global brand, that market can vary enormously depending on the country where the clothing is being sold.

How does it fit? Let us count the ways

Clothing companies include style fits for jeans like 'tapered fit', 'boot cut' or 'low waist' to guide shoppers. Some clothing is labelled XS, S, M, L, and XL – that is, extra small, small, medium,

large, and extra large – but an M in one country could be another country's L. Then there are the numbered coded systems. Germany has two different numbered systems for short and tall women. Great Britain often uses sizing codes ranging from 8–18, and the same numbers are also used in the US, but they are actually two sizes different. And in southern Europe, especially in Italy and Spain, a numbering system from 36 to 46 is used.

Help is on the way

Grading clothing sizes on real measurements is a good place to start. Mail order and catalogue companies are beginning to do this, and many give their customers detailed instructions on how to take their own body measurements. Customers can then compare these to the company's sizing chart. Some online retailers also offer a virtual 3D sizing model. There are different body types to choose from and customers can see different styles on a sizing avatar.

If a clothing manufacturer has a niche market, they may choose to produce garments that are tailored to a specific group of consumers. For example, Ferragamo is changing their shoe widths to accommodate Asian markets making them narrower. However, the European Committee for Standardization (Comité Européen de Normalisation) is working on developing sizing standards that can be applied internationally. Customers will need to know their body measurements in centimetres around the chest, waist, hips, arms and legs. Hopefully this will make for a significant improvement on the current shopping experience.

OVER TO YOU

- What should pattern makers take into consideration when grading a line for sizes?
- Should there be one international sizing code? Why, or why not?
- Should the sizing systems currently used remain in place? Why, or why not?

- 9 The _____ is missing for ten of the shirts. They were packed without plastic garment bags.

DID YOU KNOW?

There are several methods for assembling garments. In a single hand system, one person sews the entire garment. In a bundle system, a sewing operator does one or more tasks per garment and then sends the bundle to the next operator. Operators can also be cross-trained to work several machines and jobs in a modular system.

It might be because of + noun

The holes in the seams *are due to* dropped stitches.

Since the stitching is irregular, the hem is weak.

It's difficult to say, but ...

It might /could /may /must be ...

Explaining effects

The pockets were sewn differently so it looks like they are different sizes.

The hem is weak, which means (that) one trouser leg looks longer than the other.

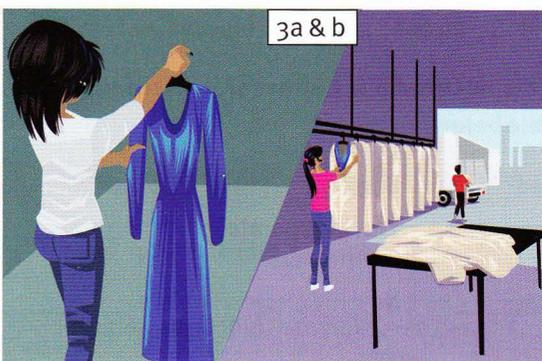

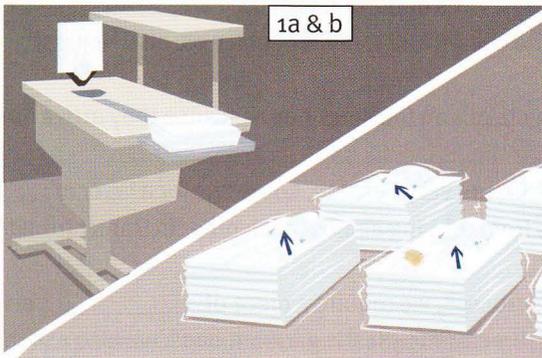

3 Listen again. Why do they think the production problems happened? Take notes.

- 1 zip: It must be _____ .

- 2 The jacket lining has dropped stitches *because / which means* it might come undone.
- 3 This skirt zip is sewn wrong *because / so* it was not specified on the line sheet instructions.
- 4 I'm not sure why there's irregular sewing on the jacket but it *might / must* be the new machine operators.
- 5 The irregular sewing on the hem is *so / due to* poor staff training.
- 6 The shirt neckline looks strange *maybe / because* they used the wrong colour thread.
- 7 The stitching is irregular *so / because of* the pinstripes don't match up.
- 8 The side zip on the skirt doesn't work *since / due to* it's broken.
- 9 There *must be / means* a problem with the packaging as 30% of the shirts are folded wrong.
- 10 We'll have to sew the pockets again *because / because of* the pocket edges are unturned.

- We are a high street department store and prefer that our evening dresses arrive clean. That means they must be packed in long _____ made of _____ instead of plastic. Then they must be put on an _____ which places them directly onto the truck.
- As a menswear retailer we sell a lot of shirts. It's important that they are _____, either by machine or by _____. To keep the collars and sleeves in place we also request _____.
- We save a lot of time putting our garments out on the sales floor because they arrive already on their _____.
- The silk shirts that our brand is famous for are very delicate, so we ask for a layer of _____ between the garments to protect them from rubbing against each other in transit from the factory to the store.
- When our shirts go through the folding process, we require a piece of _____ between the fold to keep their shape. Since they go directly into plastic garment bags, we also ask that the _____ are already in place. Customers can clearly see the size and price when they're in FRM form.

Company Profile:

UNIQLO and its Takumi Team

UNIQLO is Japan's biggest and most popular clothing retailer. They also have an international network which extends across Asia, the United States and Europe through nearly 170 stores. They work with over 100 factories to dispatch their casual mix-and-match garments to their stores worldwide.

The strength of the UNIQLO brand lies in its particular quality assurance system. One reason why the Japanese retailer has been successful is because it demands high standards of garment production, thanks to the collaboration of their 'Takumi team'.

Artisans in a modern clothing company

Would you hire someone in their 50s or 60s to work for you? UNIQLO did and it has helped them stand out in the crowded ready-to-wear market. The 16 Takumi masters each have a minimum of 20 years' experience and expertise in sewing, dyeing or textiles. The Takumi team is both modern and traditional, reflecting the import Japanese custom of honouring tradition. Profiles of the Takumi masters feature in editions of the UNIQLO magazine, also known as *UNIQLO Paper*, distributed to customers in the stores. In this way, the company gets the message out to its customers about the high quality work that goes into the garments, and customers can see who is behind the scenes.

Educating new staff

The Takumi are responsible for passing on their knowledge to UNIQLO's production facilities in China. Each week they are present at review meetings to offer suggestions on improving sewing, or other aspects of production. For example, when design details prove unexpectedly challenging, the Takumi team will identify the problem and work with factories to identify strategies to overcome it.

A winning formula?

Can UNIQLO beat other large-scale retailers based on the Takumi alone? With so many different customers, the answer may be 'no'. But the customer is at the centre of UNIQLO's business approach, not just garment production. People entering the store are greeted immediately and made to feel like they are taken care of. More importantly, the company message is that customers decide how to style their own looks. The value UNIQLO places on communicating this message to its global customers may be the key to its success. From the Takumi masters making sure a shirt is sewn exactly as designed, to the in-store customer care, this unique clothing company has a lot to offer its customers.

WRITING PRESS RELEASES

Audience: Press releases go out to news agencies, so write with this audience in mind. Ask yourself why journalists would be interested in reading about a person, product, service or event. Why is it newsworthy?

Title: Use active verbs (e.g. announce, present, distribute, endorse) in a present tense. Leave out articles like *a, an, the*: 'Sylista announces historic guest designer collaboration with Urika Wantabe'.

Content: Explain essential information: Who? What? Where? When? Why? Use your company's name and the names of major participants and avoid personal pronouns (he, they, it, etc.). You may even include a quote from someone important. Keep the tone formal.

Ending it: Write an effective conclusion. Leave your readers with a memorable idea. Always include your contact information so journalists can ask for further information, if necessary. Finish with ENDS or - # # # - .

Read it before sending: Always read your press release before sending it. Look for common errors like missing subjects and verbs, punctuation, wrong *-ing, -ed* or verb participle (*They're interested [interesting] jeans; We have been wear [wearing] them a lot*); sentences that are too short (*It's a winner!*) or too long (*We're writing to let all stores nationwide and around the world know about our new, wonderfully smelling perfume that includes incredibly delicious scents such as cedar, rose, and musk, which were all found and created in our lab during the spring months last season*).

The Fashion Short Film: Escapism at its best

Many people in the fashion industry believe that when you sell a brand, you have to sell a story. For some time now, the industry has turned to mini-movie ads to tell these stories about products. These 'fashion films', which can last from thirty seconds to four minutes, often bring together well-known celebrities and directors.

In the Chanel No. 5 story, for example, directed by Baz Luhrmann and starring Nicole Kidman, we see an incredibly famous star at a red carpet event. She seems to find the pressure of fame too much and 'escapes' from her limousine. Jumping into a taxi, she finds herself next to another passenger – an attractive young artist. With a smile, she exclaims, 'Drive!' The two then go to the artist's roof top terrace where he confesses he has no idea who she is. She explains she is a famous dancer. Throughout the film, we repeatedly see the Chanel logo, which reminds us that the story is selling perfume.

The film *Bleu de Chanel* also uses a story about a celebrity, but this time to sell men's fragrance in the commercial directed by Martin Scorsese. It begins with a male celebrity at a press conference, who is questioned about his infidelity. The film then shows us brief flashes of him and a mysterious woman, and of the same man trying to apologise to his companion or wife. Later, journalists put pressure on him to explain or apologise for his behaviour. He hesitates, and remembers his lover's face, which he then recognizes in the crowd. Suddenly, he says he will no longer behave as others expect. The final image is of the perfume bottle with the message, 'Be unexpected'.

The Gucci Guilty woman takes her role as a rebel seriously. In the Gucci Guilty mini-movie, we see her driving around a 3D city in a powerful Jaguar XK120 C-Type, leaving a trail of fire. Or is it a symbol of refusing to conform? She stops to breathe in the night air, and we see a flashback of a romantic encounter. Fully in control, the Gucci Guilty woman drives her own destiny. She leaves her love interest and drives off with mysterious music in the background. Depeche Mode's 1987 hit song 'Strangelove', covered by the group Friendly Fires, is the perfect soundtrack for this story of a woman who takes risks.

All three mini-movies are entertaining and have the look and feel of big-budget films. They are not just advertisements; they also offer a form of escape for viewers. Will the audience really get up to make a cup of tea or get a snack during a commercial break if the commercials themselves are so exciting to watch?

OVER TO YOU

- What other kinds of stories do fashion advertisements tell?
- Most perfume commercials are for women. Do you know of any others for men's fragrances, besides *Bleu de Chanel*?
- How important is music for TV ads? Why? Have you ever bought music because it was featured in a television ad?

Fashion Director: That's good to hear. I'm just waiting for the designer to ⁵ _____. We don't know who she wants to sit in the front row yet.

Stage Manager: Let me know when you find out and I'll set up the chairs with name cards on each one.

3

Fashion Director: How's the calendar for our promotional campaign for the show?

Promotional Coordinator: We're going to ⁶ _____ and do the press release about four weeks before the show, which gives people enough time to plan on coming to see it. Could you let me know the order of the sets so we can ⁷ _____? There should be one for every chair.

Fashion Director: Yes, I'll finalize that today. Don't forget I'll need to check the fact sheet about the designer and the collection, too.

Promotional Coordinator: OK, I'll email that to you later.

DID YOU KNOW?

The first retailer to put music to a fashion show was Stanley Marcus in the 1920s. He used the Ted Weems band. Many shows today feature famous DJs and digital music, with live sets played both during the show and beforehand as the audience arrives. In New York City, Mia Moretti is a 27-year-old DJ who often includes very different music styles, such as Doris Day and The Rapture.

Gorgeous Accessories Glam Up Any Look: Fashion Week for Accessories.
There's nothing like gold and silver accessories to give your look an instant dash of glam. Local L.A. designer ZeeSuz has just put out a playful and deliciously (c) *fresh* line of costume jewellery. (d) *With a nod to* ancient Egypt, ZeeSuz's line is urban yet chic. There are bronze and gold bangles, scarab earrings, and Isis inspired wing necklaces. She has reworked the classic accessories to include Anubi belt buckles. With pieces like that, you can (e) *let the glam do the talking for you*.

Menswear Trend Report: Autumn.
At the Pitti Uomo show recently held in Florence, I can report there were a few unexpected turns. All styles and trends were visible on the catwalk. Expertly executed suits were (f) *paired with* print shirts. Edgy, kilt-inspired skirts in (g) *muted tones* presented an ambitious attempt to set the look for this autumn season.

Prints: What not to do. On the Street at Brazilian Fashion Week.
Fashion weeks bring out the best and the worst in people's wardrobes. "Prints (h) *with a twist*," you think as you plan your party outfit. You may believe you are being fashion forward, but think twice before you pair that striped shirt with prints or checks. It's a combination that simply does not (i) *work*. Use block colors of similar hues to pair, say, a black or cream-coloured top with prints. Or try a splash of neon colour, which will (j) *take it to the next level*.

| 2 | soirée _____ | 6 | maison _____ | 10 | atelier _____ |
| 3 | chic _____ | 7 | faux _____ | | |
| 4 | motif _____ | 8 | palette _____ | | |

I = Interviewer, D = Designer

- I: Diego, as a (a) **high-end designer** you've had many successful collections. What inspired you this time to use a garden (b) **theme**?
- D: Well, my (c) **fashion house** has a wonderful garden in the back, where I often go to think. And I also have an English style garden at my (d) **workshop**.
- I: Are the gardens also the source of your (e) **colour range**?
- D: Oh, yes, absolutely. Nature is the first place I go to for colour with any collection, be it (f) **luxury clothes** or (g) **ready to wear** lines.
- I: I noticed you included (h) **fake** fur in this collection. Do you think you'll ever use real fur again?
- D: To be honest, fur is a wonderful luxury. But we are going green, so we have to respect the environment, animals included. Personally, I think the fake version looks just as (i) **stylish** as the real version. Women could wear it during the day as part of the trim on a coat, or in the evening for a (j) **party**.
- I: Diego, thank you so much for talking with us.

USEFUL PHRASES: DESCRIPTIVE FASHION WRITING

Give fashion descriptions using adjectives in groups of two or three: *The metallic details are **chic** and **modern**. / Gold is an accent that is **glamorous, festive** and **fun**.*

Contrast two qualities: *strong but feminine, confident yet vulnerable, urban and still country.*

14 Complete the descriptions of the photos with the correct group of adjectives. There is one extra group you will *not* need.

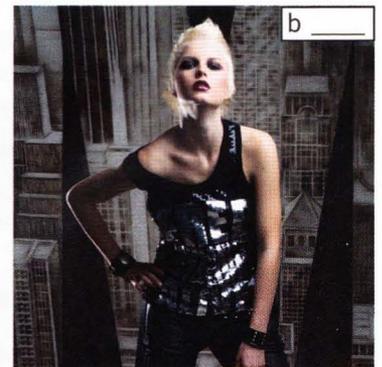

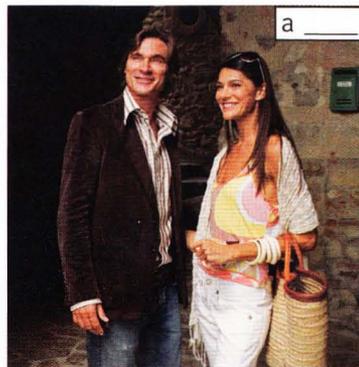

- a sensational, glamorous and modern
- b young, relaxed and cool
- c sophisticated, professional and business-like

- 1 The inspiration for my spring collection was free time. Imagine going out on a Friday or Saturday afternoon with friends and how carefree you'd feel. I tried to put that feeling into my designs and hope that the message is clear: these clothes are for a _____ look.
- 2 Everyone needs a bit of gold every now and then. My designs are for a night on the town, for special occasions, for when you want to be noticed, and especially for women who want to feel and look _____.

15 Match the adjectives to the pictures.

- 1 charming but practical
- 2 country yet urban
- 3 for a fun and easy-going look
- 4 young and elegant
- 5 edgy but still classic

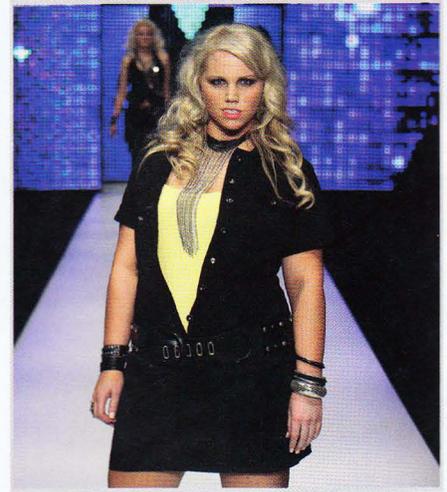

Catwalk Diversity: Age, Race and Size

The catwalk has always been a place to showcase new trends in clothes *and* models. Ever since the age of the supermodel in the 1980s, models have become celebrities, and their social lives now fill the gossip magazines. More people than ever want a career in modelling. But are the doors to the profession really open to everyone? Is there diversity of models in the fashion industry?

Age

Although there are thousands of fashion lines aimed at the 30-plus crowd, the number of older models working at fashion weeks is very small. One Spanish designer, Juan Duyos, chose four veteran models in their 60s and 70s for the catwalk in Madrid's fashion week in the fall of 2010. That same year, the famous German model Veruschka, 71-years-old, walked down the runway for Giles Deacon at London's Fashion Week. But these are the exceptions to the large majority of young models on catwalks.

Race

Increasingly, we see more ethnically diverse models on the catwalk. A South Korean model, Kang Seung-hyun, was the first Asian to win the 'Ford Supermodel of the World'. Other Asian supermodels include Du Jan from China, Hye-rim Park, who is Korean-American, and Eugenia Mandzhieva of Russian and Asian descent – they've all walked fashion shows for major brand names. However, some people suggest that the only way to increase catwalk diversity is to introduce positive discrimination, such as the demand for a minimum 20% quota of black models at the São Paulo Fashion Week.

Race diversity on the catwalk has been a hot issue for decades. Perhaps the defining moment was an event in November 1973 – 'the Battle of Versailles'. French and American designers competed with each other in a celebrity-packed fashion show. The French used elaborate sets and classical models to show off their creations, but it was the five American designers who stole the show, by using only African-American models on the runway. It caused a sensation, and the effects were felt across the entire fashion industry.

Size

One of the most controversial issues on the catwalk is size. One UK organization – All Walks Beyond the Catwalk – emphasizes size variety with their slogan 'Every body counts.' Their mission is to promote positive attitudes about body shape and size in fashion. The organization held a graduate forum on the size debate at fashion institutes in the UK in June 2010, and as a result, three colleges agreed that including a module on diversity in their curriculum was a good idea.

OVER TO YOU

- Have you seen age, race and size diversity on the catwalk? How many examples can you describe?
- How do you think catwalk diversity could positively affect people's image of beauty?
- Which groups do you believe are underrepresented on the catwalk?

DID YOU KNOW?

Window displays began in the nineteenth century, when factories began producing large glass windows for the first time. This gave rise to the storefront window being used as a way to advertise stores' merchandise. Today, many department stores have large budgets for creating very elaborate displays that often follow holiday or fairy tale themes. Celebrities and artists also contribute to window displays. Lady Gaga designed the winter holiday window for Barney's New York.

7 Sahar Nazir, a buyer for a clothing retailer, is talking about her job. Read the paragraph and choose the best word or phrase to complete the definitions of the words in bold.

As a buyer for a national chain of clothing stores, I need to make sure that we have a good **merchandise mix**¹ – our customers expect a variety of casual and classic clothing. I go to trade fairs regularly to meet with **wholesalers**², who can provide the range and quantities of products that we need. They will often offer a better deal for buying **high volumes**³. So, we might negotiate a **unit cost**⁴ of £15 per item for orders up to 500 units, and then £12 per item for orders over 500. To avoid having lots of **unsold stock**⁵ at the end of a season, I try to negotiate good rates on **buybacks**⁶ with our suppliers. For example, I recently **placed an order**⁷ with a supplier for 15,000 men's jackets on the basis that we could return up to 25% of them. Of course, there are occasions when we **overbuy**⁸ and have merchandise that we can't sell at the full price. In these cases, we might **mark it down**⁹ by anywhere from 10–70% depending on the month of the year.

- 1 Merchandise mix means ...
 - a a range of clothing of different styles.
 - b promotional sales.
- 2 Wholesalers sell ...
 - a directly to the public.
 - b to retailers.
- 3 When a retailer buys high volumes, they buy ...
 - a small quantities of stock.
 - b large quantities of stock.
- 4 Unit cost means ...
 - a the price paid for one garment.
 - b the price paid for one order.
- 5 Unsold stock means ...
 - a clothing or accessories that have not yet been offered for sale.
 - b clothing or accessories that have been offered for sale but that customers have not bought.
- 6 Buybacks means ...
 - a merchandise that retailers can sell back to wholesalers or fashion labels for some of the original cost.
 - b merchandise that wholesalers or fashion labels sell to retailers.
- 7 Place an order means ...
 - a enquire about the availability of stock.
 - b make a formal commitment to buy a quantity of stock.
- 8 When a retailer overbuys, they ...
 - a order too much merchandise from the wholesaler.
 - b don't order enough merchandise from the wholesaler.
- 9 When a retailer marks something down by 10%, they ...
 - a remove 10% of the stock from the store.
 - b reduce the price by 10%.

OUTPUT

From High-Street to the Internet Highway: E-commerce

The expression 'go shopping' means something completely different today from what it meant 20 years ago. These days, you can go shopping from the comfort of your own home: online.

E-commerce is growing rapidly – it currently accounts for around 15% of all clothing sales in the USA. While bricks-and-mortar stores rush to catch up, e-retailers are taking advantage of the opportunities provided by the virtual marketplace. Some clothing retailers are turning to social media to build communities of customers who share similar tastes in fashion. In return for exclusive offers and access to restricted sales, customers are happy to share information about themselves, which retailers can use to build customer profiles and improve their marketing strategies.

Exclusively Yours, Online

One of the most successful fashion websites is Net-A-Porter, a luxury clothing retailer whose website is visited by over 2.5 million shoppers a month. Designed in the style of an editorial magazine, this inventive site offers a unique online shopping experience. This, combined with their style apps, offer customers a chance to personalise their purchases. Net-A-Porter's customers return again and again to buy from the site.

Other e-retailers, such as ASOS, have taken it a step further by using social media to bring in customers. On social network sites like Twitter and Facebook, as well as their own website, ASOS customers can express their inner fashionista by posting photos of themselves in their preferred outfits. They can also enter competitions, write blog entries, or sell second-hand clothing or their own new designs on ASOS' Marketplace. In 2011, ASOS attracted more followers on Twitter than any other retailer, and the rewards can be seen in their impressive sales figures.

Click, Pay, Sashay?

One of the key issues for online fashion retailers is how to get past the problem of customers not being able to try on garments to see how they fit, or touch them to get a sense of the fabric. Many e-retailers have tried to address this by including virtual models with 360° photos, video clips and detailed fitting guides. In addition, by offering online instant messaging or a freephone number for fitting advice, and efficient return policies, retailers can answer customers' concerns.

The Digital Future

Future trends in e-retailing include using social media even more and offering flash – or daily – deals through social networks. Many retailers are already offering virtual fitting rooms, mobile apps and interactive video technology. The online shopper can be sure that e-retailers will take advantage of every technological innovation to make the online shopping experience as easy and attractive as possible.

UNIT 1, EXERCISE 1

2

1
My job involves crazy hours. You've got to be very flexible and personable because you're constantly working with people's public image. This can be especially challenging with celebrity clients, and I've had to work a lot on communicating clearly with them. I love it when we've put together a few looks and a client says, "Wow. I never would have thought about wearing it like that" or "I usually don't wear those colours, but they actually work well."

2
What's the best thing about my job? Well, I really like the fact that it's varied: from supervising my team and providing them with the support they need to do their jobs, to generating ideas for a new publicity campaign, or organizing an in-store product launch. I never get bored. I've even had to write speeches for our designers when they've received industry awards. The hours are long, but no two weeks are ever the same.

3
I need lots of different skills in my job. Basically, we are like fortune-tellers predicting what people will want to be wearing 18 to 24 months in advance. We need to be able to communicate our vision using hand-drawn or digital sketches. We also have to build good relationships with textile manufacturers, so that we can find the right fabrics for our designs. We are team leaders, supervising the production and the creation of prototypes. And, last but not least, we are showmen, presenting our designs to the public on the runway.

4
How would I describe my job to someone who wants to get into manufacturing? Well, first of all, it involves meeting often with our clients, who are mostly from the fashion industry, and talking about making their products. We provide a full service: sourcing the fabric and then cutting and sewing it according to the client's instructions. I spend a lot of time on the factory floor overseeing production making sure the job gets done, but my job also involves travelling a lot to trade fairs, sourcing new materials and making contacts.

5
This job has really transformed in the past 20 years. It's not just a desk job anymore, working for one editor.

These days, there are so many more opportunities to freelance, across a variety of media: print, online, TV, YouTube, and social media sites. We spend a lot of time doing research, or doing interviews, and mixing in our own opinions, too. I guess you could call us 'factual critics.'

UNIT 1, EXERCISE 8

M = Melissa, Designer,
S = Susan, Merchandiser,
E = Erika, Pattern maker

M Right. Let's get started on our first review of the spring women's wear line. Susan, are you still working on the market research?

S Really, it's just about finished. In fact, our results so far show that generally there is a positive response to our proposed line. But I'm not sure we can include all the styles if we want the collection to be profitable.

M Really? How many do you think we can include?

S Probably around 40 in total. It depends a little on the budget and on how efficient the pattern designs are.

M I see. Well, the design team is still working on the casual line, so let's focus on the career line for now. Erika, do you have any suggestions for how to make the patterns more efficient? Shall we start with the pale blue suit?

E Yes, let's do that. If we leave the collar and lapels off the jacket, it'll use less fabric and be quicker to sew. We can also reduce the number of buttons, from four to three.

S That's a good idea, Erika. What about the other pieces for the suit?

E Well, the blue trousers are a standard piece, so the hem, waistband and seams are no problem. For the white shirt, it depends on the number of design details. Melissa, what's your team thinking of including?

M The team's working on bringing a fashion-forward look to our classical line. For blouses, we're including embroidered motifs on collars and cuffs, as well as for shirts. Shirts will also have an embroidered motif on the chest pocket.

E Hmm, fewer details would mean faster production.

M OK, well, I'll keep that in mind.

S What about the outerwear coat?

M You mean the navy blue one? We're going with four front pockets

and an oversized lapel.

S I wonder how much extra fabric that translates into. We have to remember the budget, you know.

E I think the production team is sewing a sample of the outerwear coat today. When that's finished, we'll know the exact quantity of fabric we need per coat.

S OK, shall we look at which patterns we could cut ...?

4

UNIT 1, EXERCISE 12

M = Melissa, Designer
S = Susan, Merchandiser

M Hello?

S Hi Melissa. It's Susan from merchandising here. How's the research for the autumn/winter line going?

M Really well. We're ready to give the line a name: *Blue Turkish Delight*.

S That sounds fantastic. I can't wait to see the storyboard. How's it coming along?

M Good. The design team is still researching different prints for the collection. We're trying to figure out whether to include geometric prints, as well as florals and paisleys. What do you think? Are people buying prints at the moment?

S Definitely. More and more people are mixing prints with solid blocks of colour, and some people are even wearing clashing prints. It's definitely a growing trend. What colour palette are you using?

M Well, the colour theme is turquoise and dark and light blue. We're also including some green tones, like teal and emerald.

S Great, our clients will really go for those colours. They're becoming really popular.

M Exactly, and people can also mix and match them easily.

S Yeah, it sounds as if our customers will really like it. I look forward to seeing the finished storyboard at next week's meeting. Do you know what the PR department is planning for the line?

M They're thinking of promoting the line by organizing a colour-themed event in-store, with models wearing the designs. Helen will be at the meeting next week and she's planning to talk us through the PR campaign then.

S Great, well, I'm looking forward to it. See you at the meeting.

M OK, see you then.

UNIT 2, EXERCISE 1

5

1 Before the 1750s women were mostly responsible for sewing and decorating clothing. In the 1840s, two Americans, Isaac Singer and Elias Howe, invented individual sewing machines. What did this mean for the fashion industry? The arrival of machinery during the industrial revolution meant that making clothes became men's work. In addition, the use of machinery led to mass production, which meant clothing became more available and affordable.

2 There didn't always use to be shopping centres where consumers could find everything they needed. Nowadays, department stores or online specialist retailers stock a big range of items of clothing and it's very easy to find things you need. But it used to take up a lot of time for consumers as they had to buy each item from a different vendor. So, when did this organization of selling and buying change? It was around 1840 in Paris when the first retail outlet decided to combine a variety of products in one store. Soon after, many stores started selling a range of fabrics, trim and embellishments and accessories.

3 When people think of fashion, they often think of France. But, it was an Englishman – Charles Frederick Worth – who is recognized as the father of the luxury fashion house in France. After moving to Paris, he started as an assistant in a dressmaking shop. A few years later, in 1857, the House of Worth was set up. He changed dressmaking by offering consumers new ways to buy clothes, like mix and match pieces, and by putting on seasonal shows for House of Worth's designs. Clients used to tell dressmakers how they wanted their clothes to look, but with the House of Worth, the designer basically decided which styles clients would wear.

4 Designers like Paul Poiret, Lucile, and la Maison Paquin used live parades of models walking around at shows to present seasonal collections for invited journalists and merchants. Lucile, in particular, used to give her shows themes, and she trained her models to walk in a special way and gave them exotic names. This interested the audience and started the lifestyle storyline that so many brands use today. Modelling at that time was not a profession, so actresses, opera singers and dancers used to walk the runways. Later, Elsa Schiaparelli produced theatrical themed collections and her shows – with music, dance and special lighting – attracted New York's high society.

5 Individual countries have always tried

to promote their commercial strengths and in 1900, France hosted a global gathering of not only fashion designers and houses, but also merchants and inventors. The increasingly well-known couture houses did not miss the opportunity to display their creations, and they paid careful attention to the arrangement of their mannequins and sets. But next to the larger houses, small designers and shops could also show their creations. Today, fashion weeks offer similar opportunities to designers, from those at the very beginning of their careers to leading global brands.

6 After World War II ended in 1945, fashion played a major role in generating money and creating new business models. Couture houses reopened, and Dior launched the hugely influential 'New Look'. He presented it at the seasonal fashion shows in 1947, along with other designers, such as Jacques Fath, Hubert de Givenchy, and Gabrielle Chanel. These leading French designers licensed their names to manufacturers in the US, who produced more affordable clothing lines. Consumers bought the garments, along with accessories like handbags and sunglasses. It was profitable until the 1960s, when young people demanded street styles. As a result of that demand, labels had to become much more accessible and affordable.

UNIT 2, EXERCISE 9

V = Viviana, Historian, A = Andi, Interviewer

- A ... that's very interesting, Viviana. I'd like to go on and discuss the history of fashion illustration. Could you tell me more about the role of fashion illustration over the centuries?
- V Of course. Well, you see, illustration has almost completed a full cycle. It used to be the most important tool for communicating styles to customers until it was almost completely replaced by photography, but now it's popular again.
- A How did fashion illustration begin? Was it used for advertising?
- V Not really. In the sixteenth century, illustrations were included in society papers at the French and Spanish royal courts. Some very good artists were commissioned to paint high society women wearing popular styles. Many were produced as engravings – you know, when they trace a design on something like copper and then transfer it to paper.
- A I see. So when did illustration become an essential part of fashion promotion?
- V It was Paul Poiret who first used

illustration to promote his designs. He used to commission limited editions of artists' illustrations of his designs and publish them as albums. These albums were promoted as pure artwork, but they also brought customers into the atelier.

- A That was about the same time that the fashion magazine *La Gazette du Bon Ton* was launched. Which illustration styles did that publication prefer to use?
- V Many artists contributed to *La Gazette du Bon Ton*. Maybe two of the best known were Georges Barbier and Umberto Brunelleschi. They used to use wood blocks for printing, similar to the technique that is used in Japanese prints.
- A How interesting! Much later in the 1930s, the photographic camera replaced illustration in fashion magazines. Was that the end of illustration in fashion?
- V Well, historians have called it 'the death of fashion illustration' and *Vogue* and other magazines certainly preferred photographs to illustrations. But the fashion industry revitalized illustration in the 1980s and some innovative lifestyle magazines like *i-D* mixed it with photography in a dramatically modern way. It was as if illustration and photography had finally found a way to exist together.
- A Are illustrations today found only in magazines?
- V Oh no, actually, they are everywhere: in fashion magazines and as advertising campaigns as well. One famous department store in New York used illustration in an advertising campaign in the 1990s and it was very successful.
- A And are the illustrations we see today very different from those in the early twentieth century?
- V Absolutely! Today you can see all kinds of techniques used, from hand-drawn to computer generated. The important thing is that illustration continues to tell the story of fashion.
- A Viviana, thank you for sharing your expertise with us. It's been fascinating to learn more about fashion illustration.
- V You're welcome!

UNIT 3, EXERCISE 3

First, the raw materials have to be sourced from a range of international, or sometimes local, suppliers. Then they go through a series of refining stages. For example, the seeds and leaves in natural materials like cotton need to be removed so they don't go into the final textile. Next they are ready to be spun into yarn or thread on spinning machines. Once the yarn or thread is ready, the material is

woven into fabric rolls. After that, the fabric may be coloured – either dyed or printed – and then finished, for example given a chemical treatment to make the fabric waterproof, say, for outdoor jackets. Finally, the fabric may be embellished or decorated, for example with embroidery or lace.

UNIT 3, EXERCISE 7

Here at FabriTex, we work hard to provide our customers with high-quality dyed fabrics for clothing and accessories. We have a range of chemical or plant-based dyes for customers to choose from.

Our eco-friendly range of organic dyes is made from pigments derived from plants, so the impact on the environment is minimal. They're all water-based with no chemical fixers, and come in a wide range of colours, including our signature indigo, a deep blue-violet colour. Unfortunately we can't guarantee colour fastness for the organic dyes, particularly with darker colours.

For colours that are guaranteed to last, our inorganic range is ideal. Chemicals are used to set the colour and we test all fabrics to ensure colour fastness. We want our colours to stay on the fabric, not on your skin! For pale or no-colour results we use a chemical bleach.

It's important to us to ensure your fabrics are comfortable, so we have a range of finishing processes to soften them, especially for denim, or for waterproofing.

We also offer special services such as embellishment – embroidery or appliqué, or resist dyeing methods with wax designs. There's also imprinting or wood blocking for your favourite graphics, and our highly trained pattern designers can help advise you.

Whatever your dyeing, embellishment or finishing needs, FabriTex delivers high quality and speedy service! Just visit to our website, or call us on our free phone number with any questions.

UNIT 3, EXERCISE 10

B = Buyer, S = Supplier

- 1**
S Hello, and welcome to our stand.
B Good morning, thanks.
S Can I show you anything in particular?
B Well, my company is looking for some cotton knits for our summer line.
S You've come to the right place! We've got striped cotton jersey knits, polka dot cotton twill, and a cotton and poly blend, all of

which are available in a rainbow of colours.

- B* That sounds good. Could I see some swatches or samples?
S Sure, there're right over here ...
2
B Hello, I see by your stand that you specialize in yarn.
S That's right. We produce a few types of synthetic yarns but most of our production is organic.
B Oh really? What kind of organics do you produce?
S Well, we've got sheep's wool, camel hair, alpaca, angora and some cashmere.
B Great, for our winter collection we're planning V-neck wool vests, tartan skirts and cashmere sweaters, so the yarns you mentioned are ideal. Are there any samples I can look at?
S Well, we have yarn samples but we don't have any sample garments.
B Oh, that's too bad. Can I take a brochure instead?
S Of course, here you go.

3
 FD = Fashion designer, S = Supplier

- S* Can I help you find something?
FD Well, I'm looking for fabrics to inspire me for my fall and winter collection. I sell my designs in my own boutique and it's very important for me to use high quality fabrics.
S Are you looking for synthetic or animal-based fabrics?
FD Actually both. I'd like to focus on luxury, so anything that looks and feels like velvet, silk, leather and fur should work. My clients want clothes that are both glamorous and easy-to-wear, for example a black silk tank top or a velvet skirt.
S OK, we've got both synthetic and animal based fabrics for those examples. Here's a polyester-cotton blend that looks like velvet, and this is a silk-like fabric.
FD They look very interesting, but I'll have to see how they fall and drape on a mannequin.
S We have samples made up just for that purpose. There are some draped over there on the mannequins. Would you like to see them?
FD Yes, that would be great!

4
 B = Buyer, S = Supplier

- B* Hi there.
S Hello. How can I help you?
B Well, I see from your sign that your company specializes in innovative finishings.
S That's right. We do everything from easy-care acrylics to wrinkle-free cotton to fabrics for breathable

activewear.

- B* What about waterproof finishes? Do you do them, too?
S Absolutely. We've got this new process that makes outerwear – I'm assuming you work for an outerwear company ...
B That's right. I'm researching ways to make our jackets more waterproof and durable.
S I see. So, I was saying that our new waterproofing process, well, it does just that, but as well as waterproofing, it lengthens the lifespan of the fabric.
B Have you done performance tests? Could I see some statistics?
S Yes, we have. Let me just show you some recent test results on my laptop here ...
B Right, oh, and do you have a sample I can take a look at?
S Of course, right this way please ...

5
 B = Buyer, S = Supplier

- S* Hi, can I help you?
B I'm just looking for now.
S Do you work for a clothing manufacturer?
B Actually my company makes raincoats and umbrellas.
S Oh, we do lots of business with outerwear companies.
B Really? We're currently looking for a new supplier for nylon and synthetic animal fur, like fake sheepskin.
S Oh, I'm sorry to say we don't supply anything like that.
B That's a shame.

UNIT 4, EXERCISE 6

- 1**
 A = Pattern maker 1, B = Pattern maker 2
A Have you got the specs for the new winter trousers?
B Yes, I've just put them into the system.
A Are we supposed to include a cuff?
B Yes, the design calls for a 7 centimetre cuff, but I'm not sure we'll have enough fabric. I'm wondering whether we should reduce it to 5 centimetres.
A Let's make two possible patterns and see what the CAD software calculates for the fabric amount.
B OK, that sounds good to me.
2
 D = Designer, PM = Pattern maker
PM Hello.
D Josie, hi, it's Paul from Design Development.
PM Hi, Paul. What can I do for you?
D I just wanted to make sure you got the spec sheet for the coat.

PM Yes, I did. Was there anything you wanted to change before we start sewing the prototype?

D Actually, yes. Could you add another top pocket on the left front piece? I've ordered some extra material and it's on its way.

PM OK. I'll see that it gets put on and will let you know as soon as it's done.

D Great, thank you.

3

D = Designer, PM = Pattern maker

D Hi Susan. I came by to see if you've done the fabric layout on the sample cutter yet.

PM Hi John. Yes, I have.

D How's it looking?

PM Well, I'm not so sure this is the fabric we want for the shirt. Take a look at how the back yoke cuts.

D I see. Let's check the specs ... Here they are.

PM What do they say?

D Um, the body, sleeves and collar all need to be cut vertically, but the back yoke is cut horizontally. That should allow for more ease of comfort.

PM Oh, I see now. Sorry about that. I'll reprogram the sample cutter and try it again.

D Thanks.

4

D = Designer, PM = Pattern maker

PM Hi, Jen. Can I talk to you for a moment?

D Sure, Kate. What about?

PM Well, we put the design specifications for the Malibu skirt into the PDS and it's calculated that the extra fabric needed for the lining is over our budget.

D Really? That's not good news. We'll have to sew it without the lining.

PM Alright then, we'll revise the spec sheet as soon as possible. Thanks for letting me know.

5

PM = Pattern maker, D = Designer

D Is the prototype jacket ready for the style review?

PM Yes, our fit model is just putting it on. Here she is now.

D Great. Let's take a look and see how the fabric works 'live'. [to the model] Sara, could you please walk around and then sit in this chair?

D Thanks. What do you think?

PM The right top sleeve looks a little longer than the left one.

D You're right.

PM OK. I'll have to make the changes to the spec sheet. We'll let the left one out a bit.

D Sounds good to me. Let me know when the new prototype is ready.

11

UNIT 4, EXERCISE 10

PM = Pattern maker, D = Designer

D Are we ready? OK, well, to start with, I think we need to include bootcut jeans in this collection.

PM I agree – the pattern is quite basic. I think we should also remember that we can use a similar pattern for wide leg trousers.

D Yes, you're right. I'm just not sure that two wide leg trouser types would sell that well. Do you see what I mean?

PM Yes, maybe you're right. Should we go for a tapered trouser then?

D Well, let's think about that one for a moment. We can come back to it later. Moving on, which jacket patterns are we using?

PM It's a casual line so there's no space for a double-breasted jacket, right? It's too formal.

D Absolutely. I was thinking about including a cinched waist jacket. What do you think?

PM OK, but it'll use more fabric than a cropped one, so we'll have to see if we have the right amount of fabric after we put the specs in the CAD program.

D OK. Could you let me know about that, say, by tomorrow afternoon?

PM Sure, no problem.

D Great. Now, let's see ... Next we have shirts. I see from the specs that the shirt pattern allows for a lot of ease of movement. I'm not so convinced that winter is a time for loose fit shirts.

PM I see your point. We could easily modify it to make it more fitted.

D Would you have to take in a lot?

PM Probably not. I think we could do it by taking in about 3 centimetres.

D That sounds good. I'll draft a couple of designs after this meeting.

PM Great, once I have those I can start working on the new spec sheet.

D Sounds good. Now, we just need to go back and make a decision about the cut of the trousers. What do you think ...

12

UNIT 5, EXERCISE 2

QA = Quality assurance analyst,
S = factory floor supervisor

QA Let's get started, shall we? We're looking at the ladies' trouser today. I've completed my quality assessment of production and have highlighted some issues on the checklist. The first thing I'd like us to look at is the fastener: the zip was broken in about a third of the trousers.

S Hmm, that's a high rate of error. It must be a faulty batch of zips. I'll follow it up with our supplier.

QA Good, thanks. And, there were

problems with the pockets. On many pairs, the front pockets were sewn one on top of the other. Why do you think that's happening?

S It might be because we have new machinery. Our operators are still receiving training on how to use the new stand-up sewing machines. At the moment they're not always producing consistent results.

QA OK, so how about getting new operators to work side-by-side with more experienced on-the-job mentors? The mentors might help the operators understand the line sheet instructions better.

S Sure, that's a great suggestion. We can definitely do that. So, now that we've looked at the front pockets, what about the back pockets?

QA I'm glad you asked – on several pairs, the back pockets were left unturned before sewing.

S Hmm, it's difficult to say why that's happening but, again, I think that it might be a problem with the new staff. The group working on the back pockets will finish their training this week, so hopefully that will correct these problems.

QA I see, yes, let's hope so. Right, on to stitching problems... At times, there's irregular stitching and it makes the leg hem weak, which means one trouser leg is often longer than the other.

S Maybe we need to check the stitching more frequently. How about we send someone down to the sewing floor every hour to check on trouser hems?

QA I think that's a good idea, at least until we can identify the source of this problem.

S OK, I'll send you regular updates on that until it's cleared up.

QA That should also help with the final item on my list – the gaps in the side seams, which are due to dropped stitches.

S Hmm, I'm not quite sure how that happened. It must be a mechanical problem. I suggest we check that the machines are working correctly each day before we start assembling garments.

QA That sounds like a good action plan to me.

S Great. I'll include that information in my progress updates to you.

QA OK, let's hope we see a significant improvement soon.

UNIT 5, EXERCISE 8

M1 = Manager 1, M2 = Manager 2

M1 Well, I just got off the phone with the people from Nishao department store. I've got some more detailed instructions about how they want their garments packaged.

- M2* Great. Did they say what they wanted to do about folding the men's shirts?
- M1* Yes, they said they want the shirts machine-folded but not tagged, with cardboard and straight pins.
- M2* OK, and did they say whether they preferred individual bags?
- M1* Yes, they'd like them in separate plastic bags, with about 25 in each box.
- M2* We can do that. How about the jeans order?
- M1* Well, they told me they'd prefer hand-folding, and that all jeans should be delivered with hangtags.
- M2* OK. And what about packaging?
- M1* Yes, they'd like the jeans to be 50 per box.
- M2* No problem, we can do that quickly.
- M1* Oh, I nearly forgot. They told me to make sure that the jeans are packed with a piece of tissue paper in between garments.
- M2* OK, that shouldn't be a problem. That just leaves the dresses ...
- M1* Yes they want the dresses in FRM form, so not folded.
- M2* Oh, really? Then I guess we need to put hangtags on them too.
- M1* That's right, and they also want us to hang all the dresses in rayon garment bags.
- M2* Do you know what kind of hanger they'd like?
- M1* Well, they said that they'd prefer fabric hangers since the dresses are delicate.
- M2* Anything else?
- M1* On the orders? No, but they said they enjoyed working with us.
- M2* Well, that's a nice compliment! OK, let's get to work on those orders ...

UNIT 6, EXERCISE 6

- 1**
- A* The product line is for all end-users. There will be items for work, weekend, evening, day-into-evening and secondary bags, like laptop or work cases. The idea is that, as an accessory, we'll always be by your side just like a trusted friend.
- B* I see. Well, our top priority is to raise brand awareness. Any ideas for promotion?
- A* Well, first of all, with a small budget, we need to be creative. So, we're thinking of using flyers to attract more customers: they can be in the shape of our bags and we can distribute them near our stores. For this to be effective, we need a promotion printed on the back, say 10% off a purchase, with the flyer.
- B* That's a great idea, but it's also important to increase our brand recognition in a more general way. For example, we could create a

webzine where we talk about how our line has lots of modern looks, even trendy ones. And maybe this is less important, but our website can offer a 'view inside' option, so customers could almost experience holding our products in their hands.

A Those are all good ideas. Shall we see how they might work with the budget?

2

A This launch should be a memorable event, especially since we're doing it at the modern art museum. The artist Gillian Guilford has agreed to design the bottle, and the researchers are working to source new raw materials for the aroma. The purpose is to use the artist as a muse and as an inspiration for a truly unique scent.

B That's great! I'm so glad Gillian's going to be working with us on this project. So, our first priority for the marketing campaign is to link the fragrance with art.

A Yes, we should really promote the artistic connection.

B Another thing to consider is getting coverage in the fashion press.

A Why don't we get Gillian to do an interview?

B Well, she's quite shy, but I suppose she might agree to a written interview.

A That sounds good. We could put it on our website.

B OK, and we could also do a photo gallery of her at the launch party.

A Good idea.

3

A Our own brand of crockery is almost ready to launch, so can you talk us through the marketing strategy for the new line?

B Well, we have a photo shoot set up with the actress Mina Pantano. She's agreed to be the testimonial in our magazine ads. First and foremost, the goal is to get the customer to make a connection between her role as a TV mother and our crockery line.

C But don't you think that an actress with her reputation could distract customers from buying our products? She's had some bad publicity recently.

B Perhaps. Maybe we should wait and see how the photo shoot goes, but focus groups show that customers link TV roles to products.

A OK, I suppose we can give it a try. It should create a buzz, anyway!

B We also plan to do special in-store events, like demonstrations in the homewares dept. to show customers how good the line is.

A How about getting a well-known chef for those demos?

B Let's focus on the big picture for now. We can work out the details later.

4

A I've got some good news! Truman designs has teamed up with Harrington's Department Stores to handle the marketing campaign for a new line.

B Great! What's the product line?

A Intimates and loungewear for men and women.

B So what are our marketing priorities?

A Above all, with the advertising campaign we need exceptional photography for print ads and a great director for TV and online videos. The idea here is to increase brand awareness among 18- to 25-year-olds, and to emphasise the image of luxury that our brand represents.

B We could also do a behind-the-scenes video for our website offering our customers an exclusive look at the collaboration. We could call it 'Bedtime Stories' or 'Truman Tales', or something like that.

A OK, although to do that we'd need a video editor. We can also include the video on our Facebook page. What about Twitter? Could we create a viral campaign?

B What if everyone who likes us on Facebook or retweets on Twitter automatically gets entered into a sweepstakes to win free products? What do you think?

A Hmm, I'm not sure. Maybe the viral aspect isn't as important, but I like the behind-the-scenes idea.

15

UNIT 6, EXERCISE 10

S = Susan, T = Tomas, R = Rachel

S Right, so we all agree that our priority for LeeAnn Designs is to think of fashion week events. The question is, which promotional channels are we going to use? How about we begin by discussing ideas for events?

T Well, if I could make a suggestion: it would be a good idea to get a celebrity endorsement and have that person at an event. What about someone from the music or film world? Our focus groups showed that LeeAnn's customers spend a lot of their free time going to concerts or watching movies.

R I like that idea. How about a singer in a rock band? Better still, why not get several cool young musicians or actors involved?

- T Good suggestion. I like it.
 S I agree. And how about having a cocktail reception with the celebrities and inviting LeeAnn's business partners to attend, too?
 T That's a great idea. I'll get in touch with LeeAnn Designs and see who's on their contact list.
 S Is there anyone else we could invite to the event? I'd recommend including some loyal customers and influential journalists on the guest list.
 R That could become a pretty long list of names. Do we have the budget for, say, 200 people?
 S Actually, we do. LeeAnn Designs really wants to stand out from all the other events of fashion week.
 R Good, then I'd also suggest inviting some people from Sashay, you know, the company that developed the fashion show phone application? It's a really popular app.
 S I'm sorry, but I don't think that will work. It will take attention away from LeeAnn Designs.
 R OK, I guess you're right.
 S Moving on ... Let's discuss other possible events for the week. LeeAnn herself asked for something that would surprise the public at fashion week. Any ideas on that?
 R Have we thought about organizing a flash mob?
 T Well, that might work, but we've never put one together before.
 S Don't worry ... just organize it like an in-store event. But keep it as quiet as possible – the surprise element has the biggest effect on customers.
 T That's true. What about the location? How about in a park, maybe near the zoo?
 R I'm afraid I'm not very keen on that idea because little kids going to the zoo could run right into our flash mob.
 T You're right. How about doing it in a popular shopping street, say at lunch time when there will be lots of people around?
 S That sounds great, but I'll have to check with the city's permits department first. We don't want to break the law! I'll do that and get back to you. Great ideas both of you.

UNIT 7, EXERCISE 3

G = Gabrielle, Fashion producer,
 A = Anita, Merchandise coordinator,
 F = Frances, Stylist

- G Let's get started, shall we? Last week we set the budget, so on the agenda this week are the show concept, publicity, the venue and the outfits. We'll also review who's

- doing what. Anita, Frances, do either of you have anything to add?
 A Gabrielle, I think we should also discuss which modeling agency we're going to use.
 G You're right, Anita. Has anyone made contact with Estelle Agency yet?
 A I haven't done that yet.
 F I haven't either.
 G Well, I'd like you to handle that, Anita, and also please call Georges Models. We'll need to get both agencies daily rates to compare costs.
 A Sure, Gabrielle, I'd be happy to.
 G Great. OK, first on the agenda is the show concept. Could you both confirm that all the teams know about the seaside concept for the spring/summer collection? Frances?
 F Well, I still have to let the stage manager know.
 G OK, you'll have to let him know by the end of the week, Frances.
 F Right, I'll do that.
 G Anita, how about you?
 A I've informed most of the stylist team, but I still have to let Alex know.
 F Sorry Anita, who's Alex again?
 A He's the promotional coordinator.
 G That's right. OK, well, you'll have to tell him about the show concept by tomorrow, Anita. I'm meeting him the following day to talk him through the budget for advertisements and invitations.
 A I'll do that right after our meeting today. Gabrielle on the invitations, are we going to send e-invites?
 G Yes, Anita, I'd like to. Please be sure to mention that to Alex when you speak to him later.
 A I will.
 G Moving on ... How far have we got with choosing a venue?
 F Well, we've only had time to look at one place and it was too small.
 G Given how close we're getting to the show date, I think we need to make this a priority. Anita, you're going to help Frances to find a location by next week. Can you work together on that? Remember, we need somewhere near the river.
 F That sounds good. I've got a few ideas to follow up.
 G OK, do that and get back to me as soon as you have any news. Let's see ... That leaves us with the last item on the agenda – the outfits. Frances?
 F Well, I've had a couple of meetings with the designer but we still need to agree on the final lineup.
 G Do you need help with that? I'll be free next Tuesday afternoon. See if you can set up a meeting with the designer for that day and we'll try to finalize the number of outfits for

the show.

- F That would be great, Gabrielle, if you could help me with that. Thanks.
 G No problem. It looks like the show is shaping up well so far. Now, before we finish, is there any other business ...?

17

UNIT 7, EXERCISE 8

- 1 D = Director, A = Assistant
 D Let's get started on the dress rehearsal. Are all the models here?
 A Well, about that ...
 D About what?
 A Unfortunately, not all the models have reported in.
 D What do you mean? It's in their contracts: they're supposed to be on time.
 A You're absolutely right.
 D So ... have you tried to call them?
 A Well, not all of them filled out the contact information sheet, I'm sorry to say.
 D Really? Let's see what we can do to remedy the situation. Get on the phone to the modelling agency and have them email us the models' contact information, OK?
 A Right away. I'm sorry this happened.
 D OK, but we need to sort this out quickly. The show's in five days. So let's get on with it, yeah?
 2 M = Manager, A = Assistant
 M Why do we have a Y-shaped catwalk?
 A Er ...
 M The floor plan specifically called for a U-shaped one. Not everyone in the audience can see the models on the catwalk with a Y shape. Didn't the builders see the updated floor plan I sent out via email?
 A I'm terribly sorry. I take full responsibility for not telling them. I haven't spoken to the builders for a few days. I didn't realize they were working from the wrong plan.
 M You should be in contact with them every day. Well, I guess there's enough time to change things, but it's a time-consuming and expensive mistake.
 A I'm so sorry. It won't happen again.
 3 D = Director, A = Assistant
 D Let's review today's progress before going home.
 A OK, let me just bring it up on screen ...
 D Why is it taking so long?
 A Oh no ...
 D What?
 A I hate to tell you this but it looks like I didn't save today's file.
 D What are we going to do now?

- Didn't you make a back up copy?
- A I usually do, but with all the changes with the stage construction yesterday I forgot. I'm so sorry.
- D Don't worry. There's always another copy somewhere. Check your email.
- A OK, checking now ... Oh, thank goodness! Here's a copy I emailed to the stage manager.
- D Good, but from now on, make back up copies on your USB key and email me a copy every day, OK?
- A I will. I apologize again.
- 4 FD = Fashion Director, D = Dresser
- D I hate to tell you this but it looks like that model didn't get dressed on the floor covering.
- FD Well, could you go over there and check to make sure the dress isn't dirty. That's the last thing we need.
- D OK, I'll go check ...
- FD Well?
- D Er, it is a little dirty, but I don't think it will show as the dress is dark blue.
- FD I suppose you're right, but we'll have to clean it before returning it.
- D I'll see that it's cleaned. I'm so sorry. It was my responsibility to tell all the models about the floor covering.
- FD OK, but you should remind all the dressers that the models have to stand on the floor covering while changing outfits.
- D I will.
- 5 FD = Fashion Director, A = Assistant
- A Uh-oh, what is Sasha doing out on the catwalk before Umi? I should go and tell the fashion director.
- A I'm afraid to say that one of the models went out on the catwalk out of turn.
- FD What? How on earth did that happen?
- A Well, um ... I'm sorry but I think I was distracted and didn't double check the lineup sheet, so they didn't stay in the correct order.
- FD I understand. Things can go wrong. Look it's only one model out of turn, so make sure you stay by the entrance and keep track of them for the rest of the show. And, please refer to the lineup sheet... both you and the models.

UNIT 8, EXERCISE 4

A = Allison, Visual merchandiser
S = Assistant, Stan

- A OK. It looks like we've got everything. Could you dress the mannequins while I get the ladder?
- S Do you need a hand with the ladder?
- A No, thanks, I can handle it ... Right, I've got the ladder. How are

- you getting on with dressing the mannequins?
- S Great, I've just finished putting the accessories on them. Could you help me install the background panels?
- A Yes, no problem. Would you pass me the stapler please?
- S Here you are. Shall we staple the two panels together?
- A All right ... there Great. Now, on to hanging the cloud props ...
- S OK. Let's move the ladder over here. Can you hand me the screwdriver?
- A Sure, here you go. The plan says they hang over the two mannequins, so I suppose one cloud goes over each mannequin.
- S There, one of them is ready.
- A Stan, how low can the other cloud go? What do you think?
- S Well, I think it can go a bit lower. Just a moment. How does this look?
- A That looks good.
- S OK, let me just screw it in ... Does this look OK?
- A Yes, that looks about right.
- S Right, what's next?
- A Well, we've got the prop for the dog ... Is the female mannequin supposed to hold it?
- S Just a moment ... I'm looking at the plan ... Uh, it says the dog is next to the tree prop.
- A OK ... there we go. Right, the last two things we need to do are the lighting and the decals.
- S I'll do the lighting if you stick the decals on the window.
- A Sounds good to me, but are you sure you don't need a hand with the lighting?
- S Well, just tell me how they look when I get them set up. OK?
- A OK ...
- S So, does the yellow spotlight work? I've angled it onto the female mannequin.
- A Yes. That looks good to me.
- S Then the other spotlight should be on the male mannequin. Could you take a look? Does this blue spotlight work?
- A Hang on ... Yes, it looks fine. Stan, do you remember where the 50% off decal goes?
- S Yes, it goes in the upper left hand corner of the window.
- A Thanks.
- S You're welcome.
- A Now, I think we've earned ourselves a break. Shall we get some coffee?
- S Yeah, that's a good idea...

UNIT 8, EXERCISE 8

B = Buyer, W = Wholesaler

- B So, Joanna, we're very interested in some of the garments from your Spring ready-to-wear line.

- W That's great news. What garments were you thinking of? Would you like to place an order?
- B Well, I'd like to see what discounts you can offer us. How about we start with the skirts? What's the unit price on the brown linen skirt?
- W 40 euros.
- B If we order in high volumes, can you offer us a discount of say 20%?
- W It depends – that's a pretty big discount. How many units are you thinking of ordering?
- B Around 500 units. What would the cost price be per unit?
- W Well, for that size order, I can give you a 15% discount on condition that you agree to a maximum of 10% buybacks. So, the price per unit would be 34 euros.
- B Hmm ... 500 at 34 euros each, that's 17,000 Euros. I'm not sure we can meet that cost. It might be better if we reduce the number of units to 300 then. What's your best offer on an order of that size?
- W OK. For that order type I can offer you a 10% discount, providing there are no buybacks.
- B We could always discount the price in store sales, although I'd have to check with the head office before committing at this price.
- W Actually, if it's an item you think you will stock across all your stores, I'll contact my supervisor and see what I can do. Let me call her. Do you think you could wait a few minutes?
- B Sure, no problem. (a few minutes later)
- W OK well, I just got off the phone with my supervisor and she said that we could manage 35 euros per unit for the first 400 units, and then 32 euros per unit for any orders above that. That's the best we can do.
- B OK, that sounds fair. I think we have a deal. Oh, wait a moment, we still need to discuss delivery dates.
- W We can usually deliver 4–5 weeks after an order is placed.
- B Actually we need delivery within three weeks in time for our new seasonal promotion. Given that the order is a bit smaller, could you meet a shorter deadline?
- W Hmm ... We can reduce the production time by a few days, but we can't speed up the delivery times from our Asian factory. Sorry, I'm afraid my hands are tied on this one.
- B That's too bad. I think we may need to look at another garment instead. Is it a similar story for your men's knit sweaters?
- W Well, ...

WRITING PRESS RELEASES

Audience: Press releases go out to news agencies, so write with this audience in mind. Ask yourself why journalists would be interested in reading about a person, product, service or event. Why is it newsworthy?

Title: Use active verbs (e.g. *announce, present, distribute, endorse*) in a present tense. Leave out articles like *a, an, the*: 'Sylista announces historic quest

designer collaboration with UrikaWantabe.'

Content: Explain essential information: Who? What? Where? When? Why? Use your company's name and the names of major participants and avoid personal pronouns (*he, they, it* etc.). You may even include a quote from someone important. Keep the tone formal.

Ending it: Write an effective conclusion. Leave your readers with a memorable idea.

Always include your contact information so journalists can ask for further information, if necessary. Finish with ENDS or - # # # -.

Read it before sending: Always read your press release before sending it. Look for common errors like: missing subjects and verbs; punctuation; wrong *-ing, -ed* or verb participle (*They're interested [interesting jeans]; We have been wear wearing them a lot.*); sentences that are too short (*It's a winner!*) or too long (*We're writing to let all stores nationwide and around the world know about our new, wonderfully smelling perfume that includes incredibly delicious scents such as cedar, rose, and musk, which were all found and created in our lab during the spring months last season.*)
